

Willowhayne Estate Entrance Heritage Statement 9th December 2011.

In line with the design overview, the proposed design has taken into account the surrounding semi rural environment and also the conservation area, particularly around the Angmering lane entrance.

The impact to the local area has been minimised by the gates and fences being formed from timber and also ensuring that the open aspect of the entrances to the Willowhayne are not restricted in any way.

By increasing the soft landscaping, the additional planting will only enhance the character and appearance of these areas.
