

Planning Statement

for

New Garden Wall

At

32 Tamarisk Way

The proposed wall will measure 2 metres in height. The wall will be a mix of rendered blockwork and timber slats.

The proposed wall is not adjacent to the highway, by virtue of its distance and the grass verge that separates the road from the proposed position of the wall.

The road is not a highway as defined by the Highways Act 1980 and as such the wall at 2m in height accords with Schedule 2, Part 2, Class A.
