2, Hillview Crescent, East Preston BN16 1RD

As one of the neighbouring properties that look onto this building I have no objections to the proposed development. Seven other properties within the immediate vicinity have this type of conversions to their properties.

There are only two properties on this part of Hillview Crescent both on corners with an electrical substation between, so the conversion of No2 would only mirror the opposite corners conversion.

With the West elevation being the principal elevation, if this application is refused the owner can construct a South facing dormer under permitted development rights. This would certainly not be in keeping with any of the properties in Orchard Road and would be an eye saw.

G Merrington
