Subject: Gladwyn, The Street, East Preston

Hi Martyn and Richard

Please see the revised drawings attached and together with the new heritage statement. We believe they now address the various items that have been discussed over the elevations and frontage.

One of the applicants, Mr. Beamish, is a skilled brick layer and will be laying the flintwork himself with suitable assistance.

The front doors shown were chosen to provide an element of natural light to the hallway and a means of checking visitors.

During consultation WSCC highways asked for the visibility splay and unfortunately it means the front wall has to be lowered. Half round copings are suggested to finish the wall.

Any hard landscaping agreed upon will be built re-using the materials from the front wall.

We trust this now meets the requirements of the council but if you have any further queries please contact me.

Regards,
Peter.
