D&T Tree Surgery

Details

Hi Murray

Sorry for the delay
Please find the details below

To reduce large English oak from 11m to 8m in radial spread & to
raise crown to approx 4m above ground level
To reduce crown height from 9m to 7m
To remove dead wood

To raise crown of yew to approx 6ft from ground level

To reduce southern side of blue cedar by 2m to balance leaving
the tree approx 8m wide
To remove dead wood

Kind regards

Jon Thwaites
