

Tree No.	Species	Work specification
G1	2x Holly. 1x box	Group by kitchen area. Reduce Hollies in height by 2m and trim all three trees to a more compact shape
T2	Magnolia	Rear patio area Leave top middle height of tree. Crown reduce lateral branches only by 1-1.5m concentrating on lateral spread
T3	Holly	By magnolia. Spindly top. Reduce in height by 4m to allow more afternoon sunlight into the area. Trim sides by up to 0.5m
T4	Holly	Twin stem tree in corner by magnolia. Reduce in height by 3m and trim sides by 0.5m
T5	Cotoneaster	Close to magnolia. Reduce in height by 2m trim sides by 0.5m
T6	Holly	Behind cotoneaster. Reduce in height by 2m. Trim sides by 0.5-1m
T8	Lawson cypress	Spindly tree North of mulberry. Fell to ground level.
T9 a	Lawson cypress	Heavily reduced tree engulfing more important pear tree. Fell to ground level
T9 b	Pear tree	Good condition. Crown reduce tree by 1.5m on all aspects. Up to 2m over lawn area only. Prune back from Purple malus and deadwood tree.
T10	Euonymus	In front of Pear tree. Large specimen for species. Remove hazard beam limb with large crack within it. Reduce remainder of tree by 1.5m to a compact shape
T11	Crab apple Purple leaved	Between euonymus and pear. Remove major deadwood and basal growth
T12	Holly	Behind large bay tree Reduce in height by 2.5m and trim sides by 0.5m
T13	Bay tree	Twin stemmed. One stem alive and one stem dead. Remove dead stem. Crown reduce remaining stem by 2m
T14	Bay tree	North East corner, North of fire pit area. The flint wall has two cracks either side of limb. Remove large limb pressing on old flint wall and growing into public footpath area.
T15	Plum tree	North of fire pit area, Decay at base of tree and Phellinus Spp. fungus growing upon stem. Fell tree to ground level.

G2	Bay and elder group	South of fire pit area. Trim top heights by 1.5m. 'Individualize' trees rather than leave a continuous finished height like a hedge- not required. Trim all sides to a more compact shape to lessen impact upon immediate area. Removal sucker growth to improve access as directed by client.
T16	Lawson cypress	Very sparse tree crown. May require feeding, and watering in drought times to help with recovery. Remove deadwood from tree and cut back from the adj. lamp column
T17	Highclere Holly	Great condition. Trim on all aspects by about 1m to a more compact shape.
T18	Bay	Three stem tree within lawn area. Crown lift by 0.3m on all aspects. Trim by up to 0.4m to a formal shape.
T19	Cherry	Eastern flower bed by garage. Reduce back to previous points of reduction (1m approx) and leave furnishing growth on all aspects. Prune adjacent plum suckers by 0.5m max.
