

# Tree Survey/Arb implications

Dear Arun DC

A tree survey or arboricultural implication survey is not needed for this application. This is a simple Tree preservation order application to prune trees with a Tree preservation order. This is NOT PART of a development application.

This is a malfunction within the planning portal system that request this and has happened on many occasions.

Please speak with the arb officer Mark Warwick if you have any queries in this instance.

Many thanks

Marcus Brooke
