Subject: Planning ref. FG115/17/PL

Dear Mr. Baeza,

Further to our phone conversation this afternoon regarding the application above to which I have objected.

I write to inform you that the garages, of which I questioned you in the ammended plans, and which you agreed with me and confirmed had been omitted all together, are in fact separate detached garages, and not integral as I had thought.

They are in fact very much still on the plans as was pointed out by my friend luckily before I put in another representation to the contrary.
As I mentioned to you several times in our conversation, I am not an architect nor a specialist in planning illustrations,and what I took to be visitor parking bays were in fact the garages. The latest amendment will therefore not affect the current parking quota at all.

In MY defence, this oversight and ignorance stems from the fact that
I have never studied the plans in any depth as my concerns are not centred on the style or type of construction of the dwellings but the development overall and its impact on myself and surrounding properties, and village as a whole.

I trust the date for representations of the 4th. January 2018 will be amended on the Further Publicity Planning Application Notice posted on the application site on 6.02.18, and presumably a new sign will be posted outside the property forthwith to reflect the new deadlines.
