Subject: Tree planning 36 Sea lane, Ferring, West Sussex, BN125ED

Dear Nicola,

I am contacting you in response to the email document sent to me from Neil Crowther in response to my application for tree works at the above address. He stated I should contact you.

He has asked us to provide further information in order to proceed with the application I submitted. There are 2 items he requested:

- 1) The works to be done on the trees mentioned. This was given and detailed if he had read the application!!!! It is as follows- to raise the crown on ALL the trees in order to allow double decker buses and high sided vehicles to use Sea Lane Ferring safely without damaging their vehicle's
- 2) The height to which the crowns would need to be lifted would be 5 meters above the road surface. This would allow a double decker bus to travel safely.

I do hope that this information answers his questions and will now complete the application. Please contact me if further information is required.

I look forward to hearing hopefully that we can now start the process for the works to be carried out.

With my best wishes,
Mrs Jane-Anne Casey.
