REF: FG/127/20/PL

Retrospective application for the demolition of 3 No. existing buildings & erection of replacement workshop & machinery store building (amended design & siting to FG/37/17/PL). This site is in CIL Zone 5 (Zero Rated) as other development.

Dear Sir,

I am contacting you to strongly object to this retrospective application, this building should never have been approved for construction and should be taken down. It is a monstrosity and no care for the thoughts of the residents backing on to this large factory-sized building have been taken into account.

Although I live over the road to the houses backing on to this enormous structure, I can still see this building from my property, contrary to the fact that it was previously stated this building cannot be seen from the road.

I urge you to take on board the upset and ill-feeling of the effected residents in Meadow Way and surrounding Roads.

On a final note, Onslow Road is now a complete mess with the grass verges all chewed up due to heavy/large vehicles accessing the caravan site. I take enormous pride with my garden and it is hard to balance this against the detrimental, ugly building that I can see across the way from me.

Yours sincerely,
