Traffic Signal Maintenance & Introduction

BDS are a multi-disciplined Fire, Life Safety & Integrated Security Company providing a range of high-quality services to many commercial sectors. Including traffic and barrier controls We also install Home Automation and Home Security to select customers.

BDS Electrical FM offer an industry recognised reputation for sound advice and cost-effective solutions. We provide professional advice as electrical contractors on design and layout of electrical systems, lighting design, and mains distribution equipment. The breadth of experience we have gained across multiple industries and sectors means that we have the technical expertise and know-how to undertake projects large or small therefore we are the perfect choice as electrical contractors. These can vary from wiring a single new machine to installing a complete process line or fitting out a new factory. In conjunction with our clients we have grown, developed and diversified to acquire an exceptional range of experience in multiple sectors

- Project management (including H&S and principle contractor role)
- LV power distribution - HV power distribution (up to 11KV)
- Substation switchgear installations - Metering / monitoring systems
- Lighting (including energy efficient solutions) - Emergency lighting
- BMS / Data / Comms installations - Fire alarm installations
- Control panel / control system installations - NICEIC testing / documentation

Traffic Signal Maintenance two visits per annum plus 24/7/365 response

With decades of experience delivering responsive maintenance, our 24/7/365 service enables us to respond quickly supplying the right technician with the right skills.

During our service visits. Our approach is based on understanding and targeting key failure modes and predicting faults before they happen. This allows us to identify the right solution based on the identified root causes.

Helping you ensure that your system, continues to deliver consistently we will also seek to reduce the general running costs and expense of unforeseen asset replacement.

We currently provide traffic maintenance services to. The Ford Technical Centre at Dunton Essex, Ford Engine plant at Dagenham and The Ford Engine Plant Bridgend

Barrier control for pedestrian access are also provided for Galliford Try NHS Sites and Kings College Hospital London
