Dear Sir/Madam

We have not registered to speak and are unable to attend due to my Husbands disability but we had no objections before on this project as we have been in and out of the driveway in question on a regular basis with no problems at all , and it has already been proven in the past when work was being carried out on the existing property that access does work for all users as long as it's a safe speed and driven in a sensible manner which common sense prevails.

Thank You for your time to read this although we understand that it probably cannot be used but wanted to let you know our views .

Yours Sincerely

Steve and Barbara Roberts
