

The Old Barn, Ferring, West Sussex, BN12 5LL

The tree in question is a mature Lime in good health. The tree is a fantastic specimen and provides a good amenity value to the surrounding area.

We are keen to maintain the tree at a sensible size long term, so the proposed work would be a 2 metre reduction in Height and a 2 meter lateral reduction this would keep all pruning wounds to below 100mm in diameter which would be in accordance of with British standards 3998.2010.

This would also prune the tree clear of the power line that the tree in now interfering with.
