Hi Peter

Thank you for your email.

For clarity, please could you amend the application form regarding the trees and also regarding the intention of the storage yard.

Kind Regards

Nicky Moore

Hi Nicola,

I am currently reviewing the application I submitted for open air storage of 12 yards ref. FG/138/21/PL as I received an email stating my application was not yet able to be accepted until I send more information.

I would be grateful if you could assist me with some parts of the application.

Firstly asked if I could confirm the intentions of the storage yards, I.E the purposes. We plan to rent the yards to small local businesses which require local space to store either work vehicles or equipment, non of which will be

waste or hazardous chemicals. The proposal is for open air by nature and we have no intentions of having any storage shipping containers sited. Would I need to write this up and add it to the application or would this email be considered sufficient for giving Neil Growther that information?

Also I made a mistake on the application form by misreading a question about trees, I said yes to the question asking if there were any trees on the site or adjacent to land which contains trees which may be affected by the development proposals. In actual fact although there are trees on our land none of these trees will be affected by the proposed development.

Because of my mistake Neil has requested a tree survey and arboriculture report, would it be accepted if I were to amend the original application?

As for everything else that has been requested in regards to additional information I am currently completely what has been requested and will have these uploaded before the deadline of 19/08/2021.

I look forward to hearing from you
kind regards

Peter Hyatt
