6 Tamarisk Way
Ferring
Worthing BN12 5ER.

10 DEC 2019.

Dear Sirs,

I am objecting to application FG/141/19/PL. This proposal bares little difference to the previous application, in size, squashed into space, visual obstruction, danger of open pond and aesthetically defaced view of Tamarisk way.

We are instructed to use permeable materials when laying a new drive, but this proposal will cover nearly all of the garden of Elm Lodge in concrete with possible risk of flooding (See the rain soaked corn fields opposite).

It will add several ^{cars} to be garaged in Tamarisk Way to contribute to air pollution which is already linked to Lung, heart disease and dementia, according to the University College of London and should be a public health priority.

The previous owner of Elm Lodge often invited neighbours for a "friendly get together" and was always pleased

to point out the wild life that frequented the garden. Frogs, Dragon Flies, Butterflies of many kinds, newts, field mice and occasionally when when the evening darkened a bat, or owl with many pigeons nesting in the now vandalised tree.

I wonder how many of these creatures exist now that, allegedly, the developer, in the darkness of evening was heard pumping the pond dry.

The new proposal changes the windows so as not to overlook neighbours property by use of opaque glass (No vision from either side of glass). If one-sided glass is used this can accidently be installed the wrong way on ~~reversed~~ reversed at a later date.

Enemy Tom, Dick and Greta persuades us to save ~~planet~~ our planet, if allowed, this project will not help the cause in any way.

Yours Sincerely,
