5. Identification of Tree(s) and Description of Works

Please identify the tree(s) and provide a full and clear specification of the works you want to carry out.

You might find it useful to contact an arborist (tree surgeon) for help with defining appropriate work.

Where trees are protected by a Tree Preservation Order, please number them as shown in the First Schedule to the Tree Preservation Order where this is available. Use the same numbers on your sketch plan (see guidance notes).

Please provide the following information below

5. Identification of Tree(s) and Description of Works

Tree species (and the number used on the sketch plan) and description of works.

Where trees are protected by a Tree Preservation Order you must also provide reasons for the work and, where trees are being felled, please give your proposals for planting replacement trees (including quantity, species, position and size) or reasons for not wanting to replant.

e.g. Oak (T3) - , because of excessive shading and low amenity value. Replant with one standard ash in the same place.

Holly (T1): removal to ground level
Group of 6 conifers (G1): removal to ground level
Group of 2 holly trees and 1 elder: removal to ground level
Group of 1 chinese privet, 1 sycamore and 1 pittosporum: removal to ground level
The aim is to remove the trees as they cause excessive shading, have low amenity value and are obstructing phone lines. The plan is to replace with 1 whitebeam and 1 birch tree.

6. Trees - Additional Information

A sketch plan clearly showing the position of trees listed in the question 'Identification of Tree(s) and Description of Works' MUST be provided when applying for works to trees covered by a Tree Preservation Order. A sketch plan is also advised when notifying the LPA of works to trees in a conservation area (see guidance notes).

It would also be helpful if you provided details of any advice given on site by an LPA officer.
