Date 2015

East Ferring House Tree Report

T1) 1x Poplar tree signs of decay and fungal brackets present and visible on bark layer, the decay extends up the trunk regions potentially making the tree in question unstable and have a potential to fall.

T2) 1x Tilia (common lime tree) presented in good health requires remedial pruning work to B3998 standards, recommended work includes crown raising by 3-4 metres, and removal of crossing and abrasive branches.
