Please could this be uploaded as additional consultation response from engineers (drainage)

Many thanks,
David

Hi David

I have read the previous correspondence, noting that Tom asked the question about a discharge to the highway drainage system too. As a result my previous comments still apply. I think we can rule out soakage, but the applicant needs to prove that a discharge to the highway drain has been explored/ruled out. If this option proves not to be feasible, then the only other option is the discharge to the sewer. As mentioned previously, Southern Water will still need to agree to a flow rate if the sewer option has to be pursued.

Regards

Paul Cann

Dear Mr Clark,

I write in relation to the above application for discharge of condition 9 relating to surface water drainage at the site.

Comments have now been received from our engineers in relation to this applicant and concerns have been raised due to the absence of detail. I have spoken with Paul Cann today and made him aware of the previous discussions undertaken with Tom Callaway last year. Paul has confirmed that he will take a look at the previous discharge of condition application and provide a response as to the additional information which is required in this case.

I apologise for the delay in the determination of this application but should you have any further questions regarding this please do not hesitate to contact me.

Yours Sincerely,
David Easton
