10 October 2014

Dear Sir/Madam,

RE: SURFACE WATER DRAINAGE STATEMENT FOR PROPOSED NEW STORAGE FACILITIES FOR EXISTING PERMITTED SCAFFOLD YARD AND FIREWOOD YARD (RELATED TO LANDSCAPING CONTRACTORS), TO REPLACE STRUCTURES TO BE DEMOLISHED AT THE FORMER McINTYRE NURSERY, LITTLEHAMPTON ROAD, FERRING

I refer to the above matter and can confirm that the existing site contains permeable surface and does not flood in heavy/inclement weather. This is evidenced by the fact that the winter of 2013/14 was one of the wettest in recorded history, with no record of issues arising. It is the case that surface water discharge from the proposal will remain as existing and will be into the existing surface. It is held that this will not increase runoff in other areas or cause any risk of increasing flooding elsewhere.

Yours sincerely

John Collins
