

Site Address:

58 Ferring Street

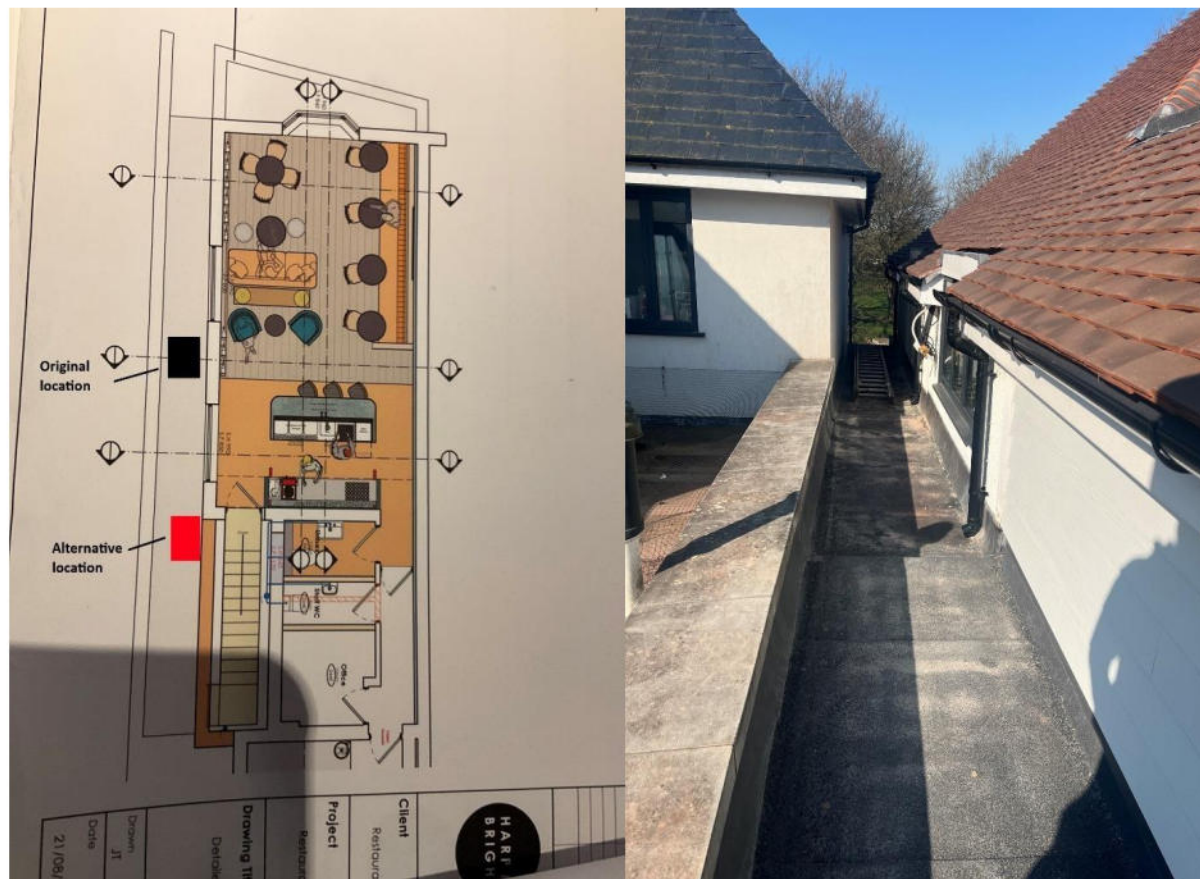

Ferring

Worthing

BN12 5JP

Planning Ref: FG/14/26/DOC

Please see the below information in hope this is the required information.

From the plans above, having the external unit in its planned position would've been in close proximity to the adjacent building.

Unit 3, 1a William Way, Burgess Hill, West Sussex, RH15 9AG

VAT Reg No: 658 8192 85

Pipework and cable have been left in situ until full agreement has been reached. My proposal is to relocate the new Mitsubishi electric SUZ-M71VA towards the back of the building.

As a point of reference, we have positioned the unit in our suggested place. This has not been fixed to the floor and sat on anti-vibration feet. It is also in close proximity to the extraction system.

As previously stated,

If the system is maintained in accordance with manufacturer recommendations, operated only during the planned opening hours and kept in good working condition: there should no cause for the air conditioning system to exceed its octave band frequency.

I hope this helps, if any further information is needed, please ask.

Kind regards

Jason Dyer
