Objection to Application FG/159/18

I wish to appeal against this application
on the grounds of parking and accessibility

The current open ground restricts the amount of
parking through out the year as is good weather it
acts like a magnet inefficiently filling the area

In bad waether there are still large numbers but many
owners will not drive through the massive puddles

Any increase in capacity will force cars onto the
small roads in the vacinity

I think it is a disgrace that full access for people
with wheelchairs is STILL not addressed

I thefore think that this application should be rejected
until:

- Pattersons walk should be extended in front of the beach huts for full accessibility
- One or more parties lay down a proper surface in the car park
and mark it with the claimed 100 spaces
