CAUTION: This email originated from outside of the organisation. You should take extra care when clicking links or opening attachments - if you are unsure the content is safe contact the IT Helpdesk before clicking or opening.

Dear Emma,

We have received the WSCC Highways reply and request that you accept this response as additional information required for you to complete West Sussex County Council's assessment. Much of the information requested in the consultation response has already been provided. No TA was submitted with the application due to the low key nature of the proposals which are explained in detail within the submitted Planning Statement. It is important that you review the Planning Statement and accompanying information in detail but a summary is provided below.

The proposed uses on site relate to a family business, run by a husband and wife - they currently have no other employees. The proposed uses on site will be owned and managed by them.

The marine workshop and yard, 'NS Marine' is run by the husband Savio Aragona who currently operates from a single garage. NS Marine is a well-established local engineering and repair business, previously based at Downsview, Littlehampton Road, BN12 6PW. In terms of size it is worth noting that, the proposed workshop does not relate directly to the level of activity of the business. The size of the workshop allows boats to sit within a sheltered space to enable the restoration and maintenance in a covered space. The arrival and departure of boats at the premises is infrequent and they will receive typically only 2 boats per week, with minimal impact upon the highway. It is typical for a boat to remain at the premises for up to 6 months at a time whilst repairs or maintenance are carried out and it is taken off site.

The proposals would require the construction of a new pre-fabricated single storey building of 450 m2, a yard area for boat storage and associated parking for at least 10 cars. The building would be subdivided flexibly between the workshop and martial arts gym uses with 3 roller shutter doors and internal WC facilities.

The part of the proposed building used as a martial arts facility would be by Worthing Modern Martial Arts Academy, also owned and run by the applicant. His full time business is the marine repairs and therefore this is carried out in his spare time, during weekday evenings between 1800 and 2100 and occasionally on weekends. The membership is currently around only 20 persons.

The container storage facility is proposed for self-storage uses (B8). There would be up to 37 containers totalling 546 m2, formed in an enclosed compound. There are at least 10 parking spaces provided adjacent to the access road into the storage area. This would be owned and operated by the applicants.

Vehicle and pedestrian access to the site will be achieved via Littlehampton Road to the south and east of the site. The proposal will include at least 20 car parking spaces overall, comprising 10 for the new building and 10 for the storage compound, which is in line with the Arun District Council Parking Standards and West Sussex County Council (WSCC) Car Parking Standards. As can be seen from the site photographs at Figures 1 and 2 of the Planning Statement there are large private access gates (set well back from the highway) that will be controlled by the applicants allowing management of both arrivals and departures from the site (as is currently the case).

Existing Site and Precedent

The **existing site** contains extensive areas of former horticultural glasshouses (approximately 2006 m²) associated with the former nursery use plus a former farm managers cottage (where the applicants now live). This is relevant as a fallback position which could in effect be recommenced at any time. West Sussex County Council will have relevant TRICS data for such uses.

The site forms part of the Highdown Farm group of commercial/industrial uses where the following current uses and planning history are specifically relevant:

Land at former McIntyre Nursery Littlehampton Road Ferring BN12 6PG which adjoins this site to the north.

FG/123/20/PL- Demolition of a polytunnel, storage building & scaffolders' shelters & racking, use of land for Class B8 container self-storage & the siting of 79 No. single-stacked storage containers, part regrading of the ground, new fencing, CCTV & lighting. Allowed at Appeal Ref: APP/C3810/W/21/3269319 on 20/07/2021.

No Transport Assessment, TRICS data, RSA or any form of highways evidence was presented as part of the planning application or subsequent Appeal.

Comments from County Highways: No objection

It is via an existing access along bridleway 2135. There appears to be no visibility issue onto the A259. The proposed use would not be a material intensification. A plan showing parking has not been submitted, therefore this is required. It is noted that an articulated lorry would visit the site every 4-6 weeks which would exit into the full width of the dual carriageway.

FG/74/19/PL- Highdown Industrial Park Littlehampton Road Ferring BN12 6PG which is north of the site and immediately adjacent to a large light industrial storage building used by PHS. 2 No. commercial B1/B8 use buildings with associated car parking, access & refuse storage. Allowed at Appeal Ref: W/4000626 10/09/2021.

No Transport Assessment, TRICS data, RSA or any form of highways evidence was presented as part of the planning application or subsequent Appeal.

Comments from County Highways: No objection or concerns raised.

FG/135/19/PL- Silo at Former McIntyre Nursery Littlehampton Road Ferring BN12 6PG. Demolition of a silo & erection of an office building (B1(a) Business), 6 No. parking spaces for office workers & erection of boundary fencing. Approved 27/05/2020.

No Transport Assessment, TRICS data, RSA or any form of highways evidence was presented as part of the planning application.

Comments from County Highways: No objection or concerns raised.

The above represents a snapshot of recent planning approvals at the Highdown Farm estate for larger and more substantial business and industrial uses, in addition to the existing large and well established businesses such as AVS Fencing and PHS Services. It is requested that West Sussex Highways respond to the submitted information (including the Planning Statement and supporting documentation) in the context of the existing site, existing and proposed uses in line with their statutory duty. The National Planning Policy Framework (NPPF) Paragraph 111 states that development should only be prevented or refused on highways grounds if the development site is deemed to have an impact on highway safety, or could cause a residual cumulative impact on the road network.

Proposed Uses

Self Storage - The proposed storage use is proposed to be carried on between 06:00 - 22:00 from Monday to Sunday, in common with neighbouring facilities where the public expect to be able to access the storage units outside of normal working hours and at weekends. The recent Appeal attached at Appendix C to the Planning

Statement included no restriction on hours of use for the allowed storage container scheme. West Sussex County Council will have relevant TRICS data for such uses but the family run business will be low key and intermittently used.

Martial Arts - The membership is around 20 members at present. The current activities are carried out in evenings (18:00 - 21:00) and on weekends and is a quiet non-intensive use. The proposed hours of use are 06:00 - 22:00 Monday to Sunday, mainly to provide flexibility for the future. West Sussex County Council will have relevant TRICS data for such uses although should this fall into Class E data, it must be noted that this would be a worst case scenario as the business is operated by 1 person.

Repairs - The applicant has independently run NS Marine since 2001 and has periodically or indirectly employed additional people including marine engineers, upholsterers, carpenters, apprentices and yard staff. It is a small family business run by the applicant although there is the opportunity to grow to employ at least 5 members of staff over time. The proposed hours of operation/use would be between 08:00 - 20:00 Monday to Sunday. In terms of operation as a small light industrial business that is operated by the applicant there will be limited traffic movements. It is notable that nearby developments (B1/B8 development at Highdown Farm (Appendix B of the Planning Statement) and B8 container storage at Land at former McIntyre Nursery (Appendix C of the Planning Statement) within the site area have been approved without traffic information be provided and with no objections from County Highways.

Most of the business work will be servicing and repair of boat engines, outboard motors or equipment with low numbers of movements. In terms of boat repairs, it is important to note that the arrival and departure of boats at the premises is infrequent and they will receive typically only 2 boats per week, with minimal impact upon the highway. Boats are a hobby activity and most arrivals will be off peak and within owner's spare time. Typical boat deliveries would be boats of 20ft in length on a trailer towed by a car or 4x4 - often from an owner's own driveway. The drop off of any boats will be pre- arranged and managed with the applicant pre instructing/directing clients and meting them on site and signage will be provided. It is typical for a boat to remain at the premises for up to 6 months at a time whilst repairs or maintenance are carried out and before it is taken off site. The applicants already receive boats from time to time and we can confirm that there is sufficient turning space (left turn off the A259) into the site and sufficient space to immediately pull clear of the highway. There is a 65m private driveway within which vehicles and potentially boats being towed, can utilise before entering the site (up to the private gates). Within the site there is ample space for the turning and manoeuvring of boats and vehicles to exit the site in forward gear. When exiting the site there is excellent visibility as noted by previous Appeal Inspectors for vehicles to enter the A259 in an easterly direction.

West Sussex County Council will have relevant TRICS data for such uses although should this fall into Class E data, it must be noted that this would be a worst case scenario as the business is operated by 1 person.

Access and Sustainability

The proposed development will be accessed to the south east of the site, off the existing access route through the private driveway to the residential dwelling 'The Chalet'. The proposed storage area has been oriented to allow continuation of the existing approach while implementing a one way system around the proposed site. Employee and visitor parking is proposed along the east boundary for the storage containers. The area has allowed enough turning space for visitors and employees in which they will exit through the same access route. The marine workshop has 10 car parking spaces and adequate yard space to accommodate the boats under repair.

The proposal will provide a minimum of 20 car park spaces, entirely appropriate with the Arun District Council Parking Standards. The proposal is also in close walking distance to the existing bus stop and train station, which means employees and visitors will not be dependant on travel by car. There is ample space within the site to facilitate cycle parking. Access into the development site will be gated at the entrance and exit of the site, ensuring the maximum level of security for the storage units and the new workshop and martial arts gym.

The site is accessed via the existing private driveway located off the north carriageway of the A259 Littlehampton Road. There are a variety of local services and amenities available along the Littlehampton Road with the built up areas of Goring and West Durrington and Ferring in immediate proximity. A bus stop is located (approx. 100 metres)

of the site, which has local bus services running from Arundel all the way to Shoreham-by-sea. Goring-by-Sea train station is (approx. 1.25km) of the site and can be accessed via pedestrian safe footpaths, with a walk time under 15 minutes, an acceptable distance for commuting. The station offers direct links to London Victoria, Brighton and other surrounding areas. Additionally, the proposed development will also provide social sustainable benefits through local employment opportunities. Therefore it is considered the proposal will make a positive contribution to the local area which is supported by development plan policy.

In terms of parking and access, as family run businesses these would be controlled by the applicants in terms of the secure operation of the site to visitors and clients via the main entrance gates. The parking is split between the Class E and the B8 areas of the site but with flexibility between these uses for both parking areas to be used by visiting clients of either facility. Furthermore, the martial arts gym would be frequented outside of normal working hours of the marine workshop and the parking spaces therefore would be used flexibly and shared during evenings and weekends.

Summary

In summary, the proposals include family run businesses that would be owned and operated by the applicants within the commercial/industrial areas of the site adjacent to their family home. It is important to the applicants that the residential property is maintained as their family home but that they can accommodate and grow both their existing businesses and the new storage facility. The entire site, including the residential dwelling and outbuildings and the new proposed industrial/commercial areas would be occupied, run and lived in by the applicants and they intend for this to be their home and place of work for the foreseeable future.

The proposals utilise the existing well used, historical and visible access from the A259 to the Highdown Farm estate and an existing private access and private gates previously used by the former nursery. No additional works will be required either within the site, on its existing private access route or to the public highway where the existing bellmouth allows movement of HGVs, goods vehicles and vehicular traffic associated with the range of light industrial and storage (self- contained facilities and timber depot/yard) uses. In decision-making terms, the National Planning Policy Framework (NPPF) Paragraph 111 states that development should only be prevented or refused on highways grounds if the development site is deemed to have an impact on highway safety, or could cause a residual cumulative impact on the road network, neither of which is the case.

We look forward to your reply.
