Eve,

Further to our conversation I can confirm that I am unable to comment without details of noise produced by the plant, ideally a noise consultants report should be obtained to ascertain the impact of noise produced by the plant on existing background noise levels at existing and potential future noise sensitive development. It is likely that significant impact may be mitigated by selection of quiet plant and provision of acoustic screening or enclosures if appropriate.

Hope this helps.

Graham

Dear Graham

Further to your response to the ASDA application on 2nd March, I have received this letter of objection to the proposal, and as you can see, on the attachment, the objector specifically asks a question on the air conditioning. I would be grateful if you could email your response to his views so that I can incorporate them into my report that I am currently writing.

Furthermore, your earlier comments talked about possible future residential development which may be closer to the AC units. There is an adjoining site (Jenkins Yard) which abuts the ASDA site for 39 dwellings. It has been allowed on appeal, but Arun are challenging the decision.

If Arun were to loose the challenge and the dwellings got approval, what measures would need to be put in place to prevent a noise nuisance on those properties?

Again, I would appreciate your early response.

Regards

Eve

Dear Sir

I attach my personal objection to the ASDA proposed changes.

Nigel Benians
