Ms. Andrews,

Please forward me your letter passing planning. If this did turn out to be the case then there would be no point in continuing with your current application.

Thank you,

Andrew Wood

I have already had a letter passing planning?

I will however get this drawn up and forwarded to you next week if that is ok

Ms. Andrews,

Thank you for your reply. That does provide information of what material you intend to use.

We will however require a plan to scale showing the extent of the glazed balcony for the purposes of making a formal decision on the planning application. Could you forward it to your plan drawer and request he provides us with one.

I would note no objection has been received thus far from any party to your proposal.

Thanks again,

Andrew Wood – Senior Planning Officer.

Please find attached what we have received re Juliette balcony

21.5 laminated safety glass was one quote but I think we are going with benchmark who we are meeting with on the 14th to finalize things. If you want to contact russ there I'm sure he can give you more details of the materials.

Thank you and kind regards

Jane Andrews

Ms. Andrews,

FG/172/18/PL - 1ST FLOOR FLAT , Ocean Parade, Ferring

Could you please provide an additional elevational drawing indicating the juliet balcony and the materials of construction that would sit in front of the Bi Fold doors proposed.

Please contact me on [REDACTED] if you have any queries regarding this request.

Regards,

Andrew Wood MRTPI
