2nd June 2018

Dear Mr Crowther 32 & 34A Sea Lane Ferring - FG/174/17/PL

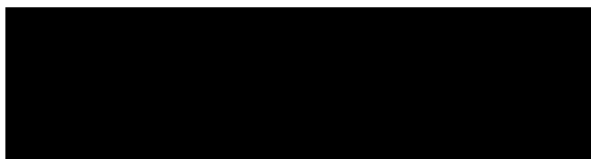

Thank you for your letter of the 10th May advising that this development has been granted planning permission.

We note that the existing 1.8m high fence is considered adequate mitigation to significantly reduce the frequency of cricket balls oversailing the fence, though insufficient to stop all shots.

The report stated that by extending the height of protection to 3m, a higher reduction of risk was available.

This technical report by Labosport went on to recommend their client (Designer Homes LLP) discuss the plan with the ECB and / or Sport England along with our club to ensure whatever system is proposed is suitable in mitigating the risk and practicable for the club's use.

Given the recent serious injury to a 5 year old boy in Poole when hit in the face by a cricket ball oversailing the school boundary protection we would have preferred this discussion to have taken place.
