BN125HD. Dear sirs, further to my discussion with Mr Woods on the 22nd March, I would like to say that the revised 2nd application is worse! Two underground car parks with the entrances opposite each other on a dangerous corner is an accident waiting to happen. The road has already subsided the side of Blue Waters . Anyone who stands on the corner can see the amount of traffic which is a "rat run" from Worthing to the A259 . Getting out of ones house for appointments is already difficult because of delivery vehicles parked on the narrow private road where no two vehicles can pass. I would like you to take these comments into consideration. I believe I speak for the majority of the road. Sincerely Mary G Sethi.
