Subject: SCAN

Please find attached the scanned site plan showing the overlooking sight lines into the rear of our property and into our private hot tub.

Please also note that the access splays shown by the applicant for access to the underground car park are not possible since they have shown the splays crossing our land. I have highlighted this, and this boundary can be confirmed by referring to the land registry filed plans for 3 Sea Drive or by a site visit where the different driveway finishes highlight the boundary.

Please upload this document to the planning website.
