Comments from Greenspace

Further to the submission of Landscape Plan A-17-31-FW dwg 200-06 Rev A, I can comment as follows.

The proposed site contains an existing and establishing planting scheme implemented at the time of the ASDA store. This planting is establishing well and contains a mix of trees and shrubs both evergreen and deciduous which in context are adding value to the location. This planting appears to have been disregarded within the proposals in particular the hedging to the south eastern boundary which is to be lost to a pathway with the proposals as shown. Juvenile yet establishing trees also in this location and within an existing central island planting bed will also be lost if the proposals go ahead as detailed.

The proposed planting scheme contains plant species which would be considered more ground cover ie Hebe and Senecio rather than adding landscape structure planting, without any screening value. The trees indicated are also at a smaller size at 12-14cm girth to those in existence.

My recommendation is that the proposed landscape scheme is inadequate regarding what would need to be removed in order to implement these proposals. The planting proposals are not replacing on a like for like basis and is providing no mitigation to compensate for the new use of this area. These proposals will cause impact to local residents and will also be seen from the wider area particularly from the SDNP to the north. Further landscape detail should be considered and incorporated into this proposal in order for the landscape value and the impact on its surrounds not to be compromised.

I would recommend an objection on landscape grounds to the proposals at present which could be overcome with a more thoughtful and complete landscape proposal. I would recommend that further landscape detail is submitted for approval or conditioned along with any decision.
