6 Tamarisk Way.
Ferring.
Worthing W/Sussex
BN12 5ER.

21st January 2019.

Dear Sirs,

I urge you to refuse the application reference of F.G/220/18 even though it is professionally illustrated by architects/Developers who have allegedly developed in Ferring perhaps more than once and sadly gave the residents of Tamarisk Way the assurance that would not develop and only wanted to retire in Ferring.

My first objection is that they cut down a healthy & mature tree full of pigeons nests for the purpose of obtaining a clearer view across the fields opposite.

Secondly, due to bends in the road of Sealane it is dangerous exiting Tamarisk Way and more cars from this development will not help with traffic or pollution. Thirdly, the pond in the garden is part of the Ferring drainage system.

and needs to be cleared of debris and foliage on occasions, the pond is also to be covered with decking, which in time rots and can be dangerous to walk on and can clog the drainage if broken into pieces.

Fourthly, Ferrings history is involved with both houses, one on each corner of the entry into Tamarisk being gate houses to the once estate that existed many years ago, to fill the gap would make the obvious visual contrast with the house on the opposite corner (MAGALIA) and would give precedent to allow a similar application.

This developement will by its nature destroy the openness of the road and so will further alter the characteristics of the immediate vicinity.

yours Sincerely
