Dear Arun District Council

FG/29/20/PL

A couple of years ago you approved building work within the grounds of Onslow Caravan Park, Onslow Drive, Ferring BN12 5RX. We were reassured (despite initial concerns it would disrupt the existing peace and quiet we enjoyed in our back gardens) that this would be a small storage unit to service the site. After petitioning against the planning permission, and whilst awaiting a verdict from the Council to address our concerns regarding our objections, we observed construction beginning on the site regardless.

The next few months greatly impacted our daily life as they proceeded to build the enormous building, with some days heavy machinery starting at the crack of dawn and I'm convinced was operational outside of the legal building timelines.

This used to be a pretty, well maintained caravan park at the back of our home, where, for the last 28 years we have had no issues with whatsoever (apart from the removal of the trees which amounts to a large loss of habitat for the local avian populations, the trees also gave us adequate privacy and seclusion from the site). Unfortunately you decided to grant the building to go ahead in their grounds which now obliterates the beautiful view we had of High Down Hill and the South Downs. The building also blocks out any evening sun we are lucky to enjoy in our North facing back garden. This structure now affects 5-6 of our neighbours' homes in Meadow Way, Ferring.

We are appalled to see a new planning request go up with a suggestion of '**proposed elevations & roof plan**'. If the roof is elevated, it will make an already dark back bedroom and garden even darker!

The Council's current advice is to get a petition going if we are unhappy about the new plans, so please accept this as our complete disgust and upset that this building was ever allowed to be built in the first place and has now raised its head again for further development. Should heavy machinery go into the structure then this raises many new concerns of having industrial machinery in the heart of residential Ferring.

Please, please take our local comments and views seriously, our quiet pretty little village has already changed far too much over the years for the equivalent of a 'factory' site to be allowed.

As a further note the tidy grass verges along Onslow Way have been churned up by large vehicles gaining access to the site, and this is even before the owner has expanded large building space.

If the past flagrancy to Council procedure allowing residents to adequately voice their concerns is allowed to continue, we will be left with no other choice than to explore every option available to us.

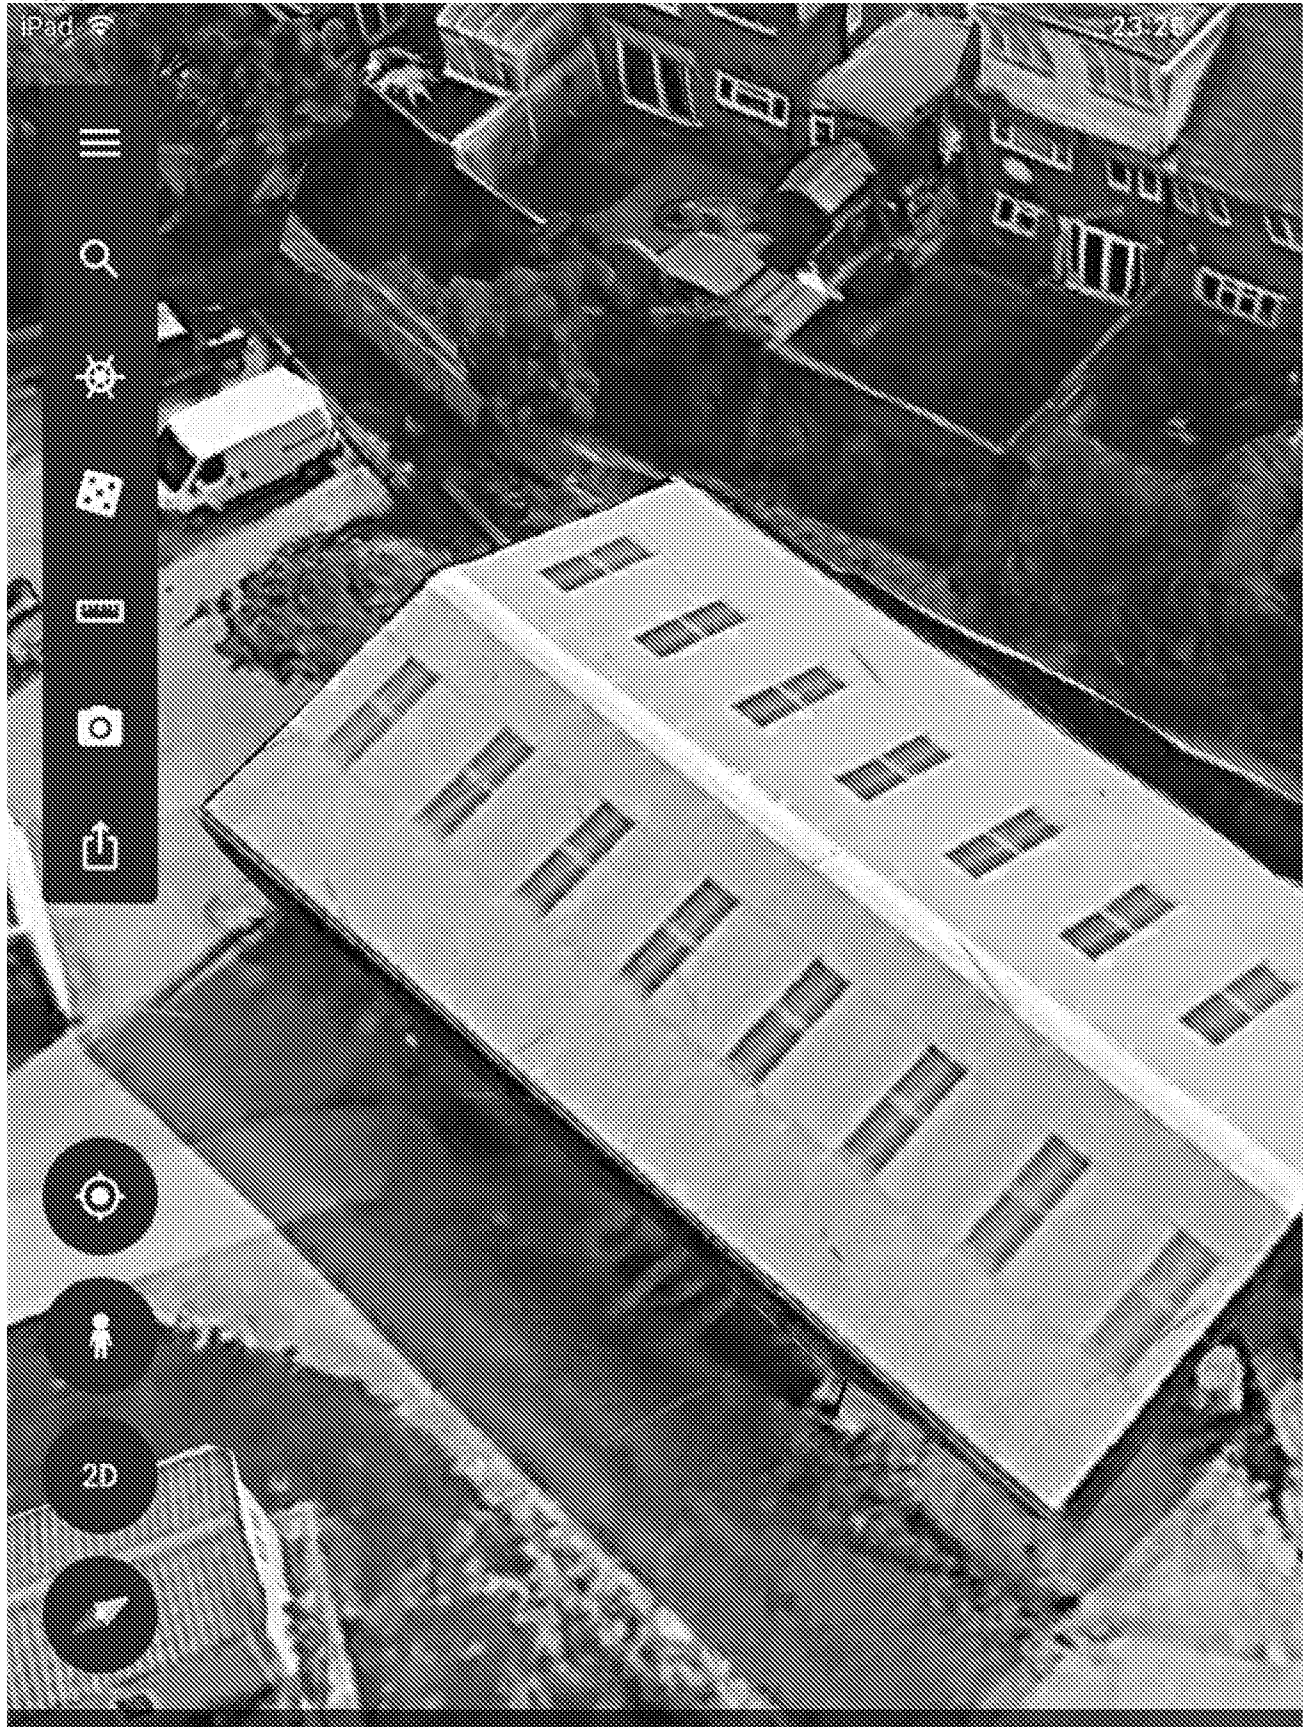

We look forward to working with you in coming to a resolution on this issue.

Kind
regards.

This is before picture

Happy

This picture after just look at the border line has been moved to get the planning permission
