Thornton Heath,
Surrey CR7 8JJ.

Dear John,

Re: Proposed Site at Highdown Industrial Estate, Worthing

I refer to your email of 9th January and attached letter from the South Downs National Park authority regarding the lighting proposal.

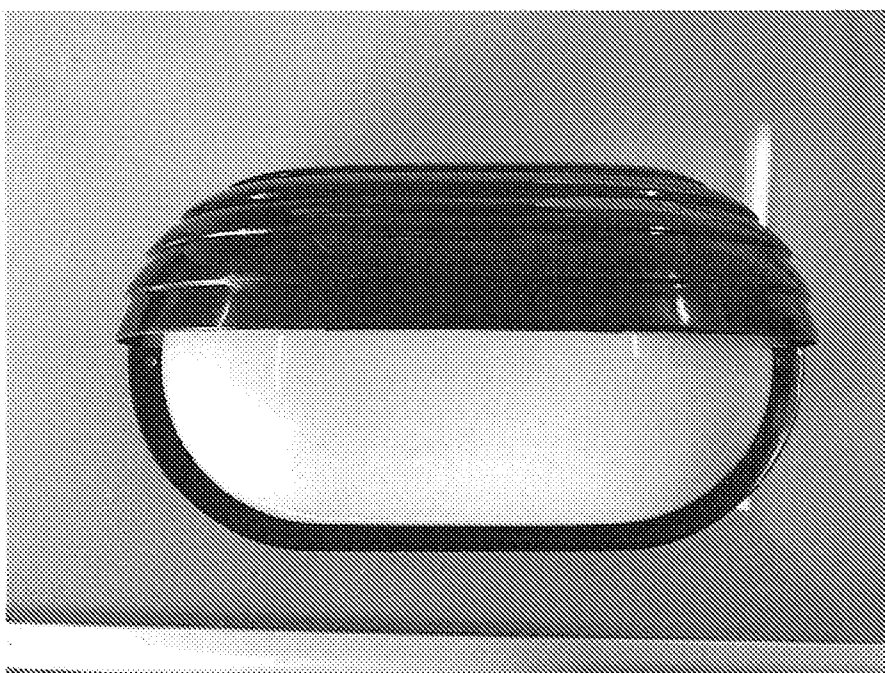

I have attached some photos showing how the light fittings are fixed to the islets of the containers. These photos were taken at the Standby Self Storage branch in Croydon and this is how we propose they are installed at this new location.

As you can see from the photographs, the eyelid of the fitting covers a large percentage (approximately 50%) of the light fitting to ensure that the light does not escape upwards. It is proposed that the same type of fittings are installed at the new site and also fitted at the same height, as shown on the attached photos, as this ensures the light is kept below top of the containers Units.

Yours sincerely,

John Ford
