Re: FG/41/14/PL

The application to remove condition 6 imposed under FG/21/21 is to allow the applicant to live on site during the self build project.

Planning permission was granted in FG/104/10 for a security guard caravan to protect tools and materials over night during the build but this will also be covered by the applicant living on site.

The Applicant is not only the Project Manager but he is also fully involved in the build carrying out all first fix carpentry work and assisting other trades.
