Dear Sirs,

Re HANGLETON NURSERY FERRING BN12 6PP – Importation of Material

I am the owner of the above site, which I purchased in 1996. Over a period of approximately 6 months we cleared the site of dilapidated greenhouses and old buildings.

From around 1997 we allowed a skip company, Hire 2000 Skips, to bring in skips containing hardcore and concrete, which we subsequently crushed to produce saleable aggregate, sold from this site. We estimate we received 8 loads a day from this company up until 2000.

We introduced further aggregates supplied in 30 – 40 tonne trucks from companies such as Kendalls Ltd, Dudman Transport and also Chip Bark from AHS Ltd and this was up until 2011 when we ceased this activity and Just Aggregates continued.

Surplus soil was also brought into site throughout this period, which was screened and added to the green waste that was shredded and sold from site as Screened Soil / Mulch products.

We attach a typical weekly sheet which gives an indication of vehicle movement into site only.

I trust this information is of some assistance.

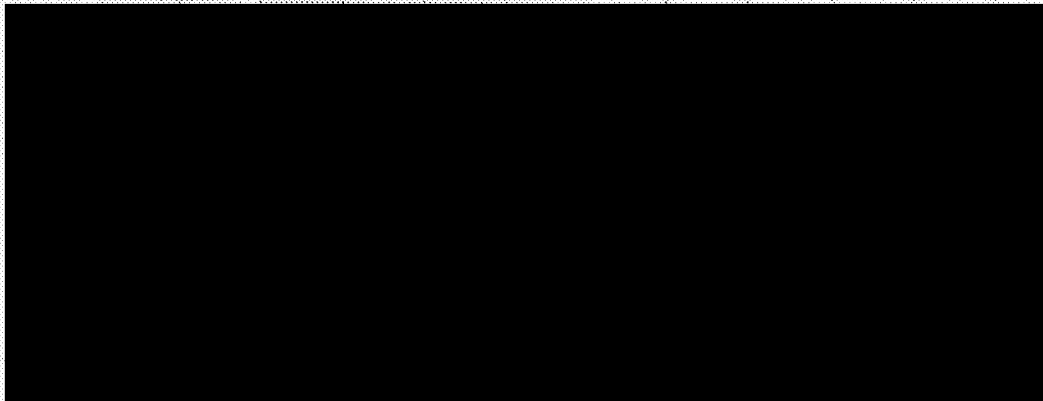

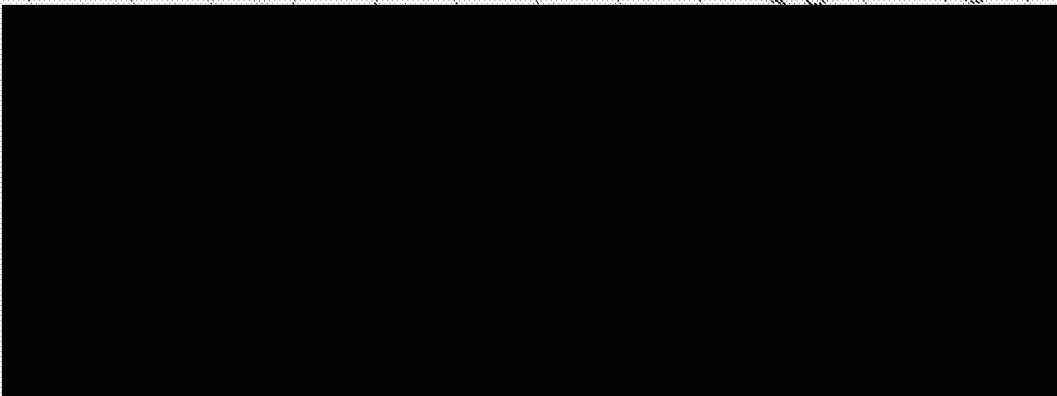

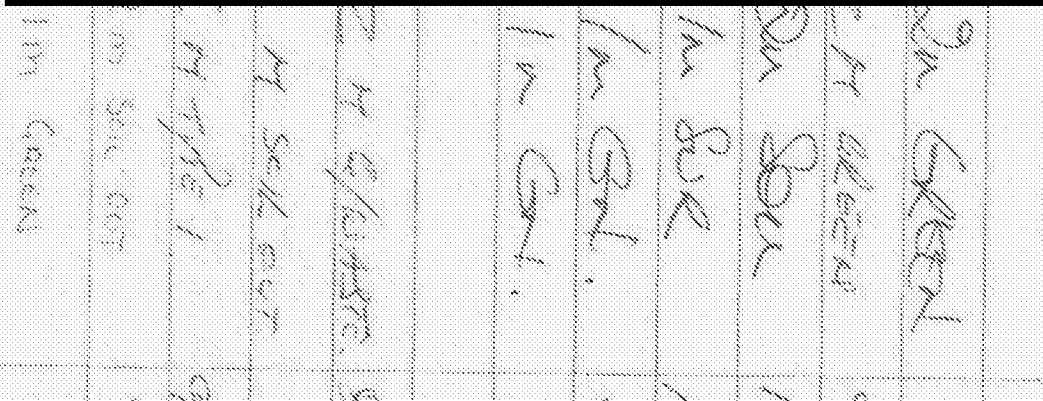

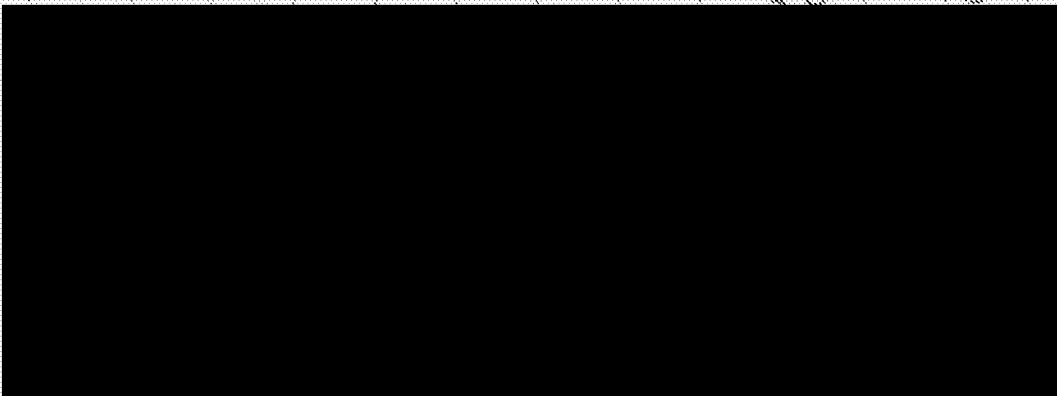

Yours faithfully,

E.S Taylor
Managing Director
