Dear Zac

I understand from my client that he has been in contact regarding further designs for the gain silo at Hightown. I have attached three scheme designs for you to have a look at and comment on whether you feel these would be a suitable design for this location. We are not tied to these materials and would be happy to take any comments on design and the scheme that you feel would be more appropriate.

If you would like to call once you have had the chance to have a look, please do. I know my client would like the opportunity to meet and discuss these designs, either on-site or at the office.

Here is a link below with 3 schemes and photos of a 4th design concept.

[REDACTED]

I look forward to hearing from you.

Regards

Alex
