Rife Way
Ferring
West Sussex

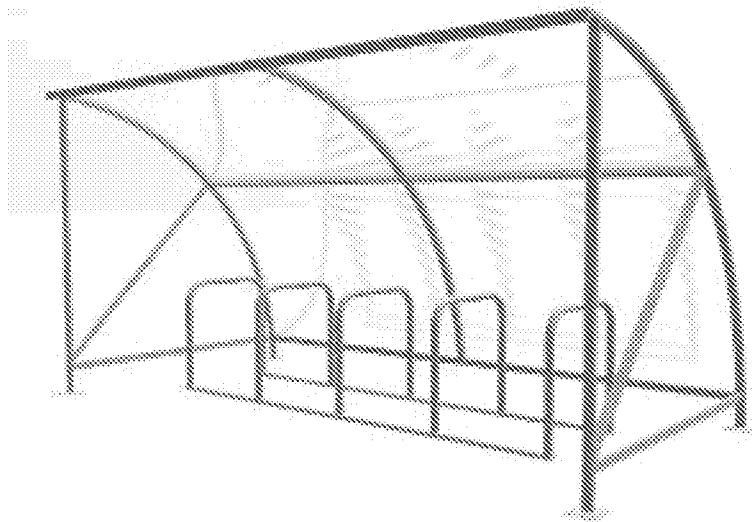

Re planning application FG/203/18/PL

RE: Condition 6.

This application is a part of the much more extensive Ferring Country Park operations. Parking for visitors and staff are separated and secure indoor facilities for staff are already provided with the main complex.

To comply with this planning condition the proposal is to provide a covered cycle shelter to serve visitors cycle parking located in or adjacent to the main visitors carpark.

The picture below illustrates the type of 10 cycle shelter proposed enabling users to padlock their cycles to the structure for the duration of their stay.

We trust this proposal will meet the Authorities approval to enable release of this condition.

Ferring Country Centre.
