

Subject: RE: application by WIDAKS

Hi Andrew,

Thank you for this.

Environmental Health has already commented on the acoustic submission and is satisfied with the conclusions drawn. The equestrian facility to the north of the application site was identified in the report as a potential noise sensitive receptor (which I believe Planning specifically requested) and residential receptors in the vicinity (Carol Ann House, Highdown Hill Cottage, Hangleton Lodge, White Lodge and staff accommodation on the site).

Environmental Health therefore has no further comment to make on this aspect of the application.

Thanks,

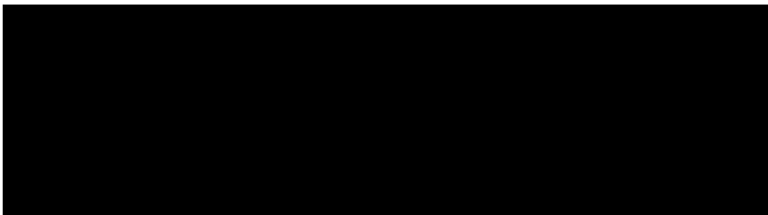

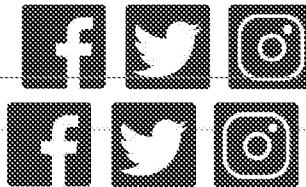

Kate.

Hi, I have been contacted by a Mr Fox who has concerns regarding the veracity of the noise survey undertaken. His reps are on the system. Can you make sure these are brought to the attention of EH before they comment on the noise survey.

Can you ensure this email is also placed on the relevant application file.

Regards
karl
