Subject: Re: Planning application for WADARS

Dear Karen,
Thank you for copying me in to your e-mail to 'Planning' at Arun.
I note your concerns and reasonings.

Although it is not a part of this planning application, on my recent personal site visits I have also noted the radio-mast near the eastern boundary of Reynard Nurseries. At the moment the 4G-EMF waves do not pose a threat to the wellbeing of the animals nearby; but should this mast be upgraded to a 5G intensity, the ongoing health concerns from the increased microwave radiation are quite likely to adversely effect the animals, if not the humans in that area. There is plenty of peer-related research available on this issue.

Something to bear in mind for the future.

Yours sincerely,

Colin
