Subject: RS18.54.DC01. Temporary hedge removal and reinstatement- Plant type
Attachments: RS18.54.DC01. Temporary hedge removal and reinstatement. 18.06.2020.pdf

Dear Zac,

Further to our telephone conversation earlier this afternoon, we have spoken with our clients and can confirm that the replacement hedge infills (shown hatched on the attached drawing) will be an established specimen of Red Robin (*Photinia × fraseri*) plant and no other planting or vegetation is proposed other than what is currently there.

Please kindly confirm that the above is satisfactory and we trust that this condition will now be discharged. If you have any further questions then please don't hesitate to contact me.

Kind regards,

Tom
