Dear Sir/Madam

Application for tree works including a TPO and in a conservation area

Over the last 40 years and approximately every 5 years My husband or I has applied for permission to lop tree T3 in our garden. The last application was in 2013 when approval was given.

The time has come again to reduce the height of T3 by crown reduction and also to attend to other trees in our garden by crown reduction. These are an ilex oak close to the front gate of our property, a eucalyptus also in the front garden and a hornbeam growing across the border wall between our vegetable garden and the local authority land on the west side of Ferringham Lane. Ownership of this hornbeam would appear, by virtue of its position, to be shared between ourselves and ADC. Your opinion is therefore sought and a site visit requested.

We attach our formal application for Tree works: works to trees subject to a TPO and notification of proposed works to trees in a conservation area. We also attach a plan showing the position of the trees in question plus a series of photographs which help to illustrate the size and shape of the trees for which permission for tree works is sought.

We request that a contact with us is made prior to any site visit so that we can be sure of being present to discuss the siting of the hornbeam across our boundary.

Yours sincerely

A large black rectangular redaction box covering the signature area.
