Design Statement

Influenced by the context, the design makes new connections with external space and the views beyond. The form is fragmented by changes in materials and deep overhangs which also provide solar shading. The form is softened by the introduction of a sedum roof which draws the surrounding landscape up to the second floor level. A contemporary aesthetic is achieved through the large openings and the use of zinc fascias, white render and rockpanel cladding. The introduction of patina sea green soffits brings a playful element to the form, while imitating the colour of the sea.
