Good morning

I would like to make some representations about the proposed building works on the above property which backs onto Patterson's walk where I regularly walk.

I feel that the modern somewhat clinical design, appearance and layout is totally out of keeping with the other properties along the walk and due to the size and extensive windows must surely have an impact on the level of daylight and privacy on the properties either side.

I have lived in Ferring for 26 years and one of its most charming characteristics is that all the properties are unique and well kept but at the same time blend into the environment, giving it a real community feel.

We need to safeguard our coastal countryside and village from too many ultra modern developments such as this as if we let this go ahead I fear it will open the floodgates and Ferring will lose its appeal and devalue other properties.
