This application has been dealt with in accordance with the Development Control Scheme protocol for small scale proposals which include up to 5 residential units or extensions to single units accessed from roads that do not form part of the Strategic Road Network (SRN). As such the comments provided by Local Development should be considered to be advice only, with respect to this planning application.

This proposal has been considered by means of a desktop study, using the information and plans submitted with this application, in conjunction with other available WSCC map information. A site visit can be arranged on request.

The proposal is for the extension to an existing caravan site with access onto Long Furlong via an existing access point. From an inspection of the plans alone it is not anticipated that the proposal would generate a significant increase in vehicle movements to the point where a highway safety issue would arise.

WSCC therefore has no highway safety concerns regarding this application.
