Attachments: 130515 Noise Report for Bognor Relief Road Viaduct Construction Calculations.pdf

Karen,

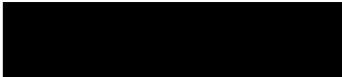

Thanks for the brief chat over the telephone to explain the above.

Firstly, I confirm that the application is just to vary the Condition 40 as explained at Q5 on the form and covered in the attached letter which you should have.

Secondly, as you might see from the correspondence, you will require a Noise Report prepared by 24Acoustics which has been prepared at the request of Graham Evans in the Council's EH Department. I attach same for your reference.

Neil Crowther is well briefed on the matter suggesting that he might be the case officer in this instance.
