No objection in principal, it is noted that the variation will permit unrestricted 24 hour working between 1st December 2013 and 30th April 2014.

It is accepted that night time delivery and offloading of beams is unavoidable, as is the construction of the viaduct over railway on a continuous 24 hour basis during 3-4 weekend possessions. The view that noise levels from the former are considered likely to be no greater than operational traffic noise levels from the new road is noted. I would suggest that any "additional viaduct construction works" due to works which unavoidably run over do not take place during the night time period (23.00-06.00).

A limited number of residents (principally in the vicinity of Sack Barn) will potentially be significantly affected by night time works, the offer of temporary hotel accommodation to these residents during the weekend possessions should be considered. Further noise assessment once works have commenced may inform this decision.

The contractor may wish to submit an application for "Prior Consent" under S61 of the Control of Pollution Act 1974 formalising the noise minimization steps and proposing maximum noise levels/noise monitoring at significantly affected residential premises, as appropriate.

Graham Evans

Senior Environmental Health Officer
