Complaints from neighbours concerning light, falling debris and potential of failure in close proximity to properties.

#### Visual reports:

|      |                             |     |        |       |        |      |      |                                                                                                                                                                                                                                                                                                      |
|------|-----------------------------|-----|--------|-------|--------|------|------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| T 38 | Pinus nigra<br>(Black Pine) | 420 | 22.0 m | 9.0 m | Mature | High | Good | Tree is of good form and has been pruned to the east away from the near housing estate. Several moderate dead limbs are present and still hold dead foliage. 2 no. moderate deadwood limbs are present at 15.0 m height to the south.                                                                |
| T 39 | Pinus nigra<br>(Black Pine) | 440 | 22.0 m | 8.0 m | Mature | High | Good | 2 no. moderate deadwood pieces are noted at 3.0 m height to the south. 2 no. major deadwood limbs are noted at 3.0 m and 6.0 m height to the north-west. A moderate hanging limb is noted at 5.0 m height to the north-west. A further moderate deadwood limb is noted at 15.0 m height to the east. |
| T 43 | Pinus nigra<br>(Black Pine) | 350 | 22.0 m | 8.0 m | Mature | High | Good | Moderate and major deadwood (c. 5 no. pieces) are noted over the golf course, with several other pieces noted over the adjacent garage.                                                                                                                                                              |

The Sycamore and Field Maples are in good health but in need of management on boundary line.

Yours Sincerely,

Nick Wilson  
Director
