Description

Our **Instant artificial Deluxe Boxwood hedge** is a brilliant alternative to a living hedges. Our artificial boxwood hedges are suitable for long term use both outdoors and indoors. Our instant hedges are built on a timber frame and sat in a tanalised timber trough which can either be sprayed matt black or left as a natural wood finish. Choose from our varying heights or visit our bespoke hedge section if you need your hedge to fit specific dimensions.

Artificial Boxwood Hedge Quality

Our artificial **Boxwood** foliage is made from durable plastics and latex shaped to create a 100% botanically accurate leaf structure. The foliage is clad onto a heavy duty plastic mesh which allows the foliage to be flexible and hard wearing. All timber used is tanalised which means it has been treated to prevent any rotting and enables your hedge to be a long term outdoor fixture. We are so confident in the quality of our hedging a guarantee is offered.

Where can I use this Boxwood hedge?

Our **artificial Boxwood** foliage is UV stable which protects against any discolour or fading, this allows the boxwood hedge to stay looking at its best outdoors as well as indoors. The framework the boxwood hedge is built on is hollow which allows the wind to blow through as it would with a natural hedge. Many other artificial hedge designs are clad onto a wooden shaped box which can catch in the wind and hinder the security. Our design prevents any of this so no matter how exposed your area is the hedge will be safe. The classic design of the replica boxwood hedges lends itself well to many locations, settings and designs. Some of our most popular requests are for decking areas, roof terraces, privatising homes, window boxes, office divides, temporary screening, outdoor smoking areas, shop windows and commercial entrances. No maintenance is required for your boxwood hedge so you can enjoy its classic and contemporary look from a distance.

Please select the height you require from the drop down menu on the right. Also, please select whether you would like a black trough, or would prefer it left as a natural wood finish. Please note the depth of the hedge can be altered if required, we believe the most in proportion depth is 25cm, there is approximately 5cm of foliage either side of the trough this makes the hedge portion of the display anything up to 35cm, please always bare this in mind when selecting the trough depth. If you have specific height dimensions that are not listed on our website then please visit bespoke hedges where you can use our calculator to produce a costing for your specific dimensions to get the perfect **artificial Boxwood Hedge**.

Delivery of hedges

Hedges if ordered in quantity are normally delivered to you on a pallet. The hedges themselves are not light so you may need an extra person to help off load the hedges from the pallet, the couriers are not obliged to bring the hedges into your house as they only offer a kerbside service. We can get bespoke couriers - please call for details.

Delivery & Dispatch

Items can take up to 5 working days to be prepared for dispatch other than our standard unpotted items which can be dispatched within 24 hours. For bespoke items or hedges lead times can vary so please call for an accurate ETA. Once items have been prepared, they can be dispatched via an express service which will reach you the following working day or a standard delivery service which can take up to 5 working days. We will e mail you on the day of dispatch so you know your parcel is on its way to you. Please note all items delivered by courier will be via a curb side delivery service which means the driver is obliged to off load your order from vehicle to the roadside that borders your premises. This service does not include set up or assembly or removal of packaging. For this reason it is advised that if ordering larger items you organise help to move items into your premises.
