

FP/129/19/HH

Dear Sir

PROPOSED EXTENSION, 43 DAVENPORT ROAD, FELPHAM, BOGNOR REGIS, PO22 7JS

We confirm having submitted an application for householder planning consent, via the Planning Portal,
Ref. PP-07918134v1

Enclosed please find three copies of your **Householder Validation List**.

We also enclose 3 copies of drawing 1901.6 confirming the dimensions to boundaries.

We confirm that the site is not within the Lidsey Foul Water Treatment Catchment Area.

The site appears to fall within Flood Zone 2, although the Environment Agency flood map seems to ignore the existence of the sea wall built by Arun District Council in 1999/2000.

FLOOD RISK ASSESSMENT FOR MINOR HOUSEHOLD EXTENSION IN FLOOD ZONE 2.

There is no perceived risk of flooding from any river or watercourse.

The apparent risk is from tidal surge.

The floor level of the extension is level with the highest ground floor level in the existing house; a previous extension has a lower floor level.

The proposed floor level is a minimum of 300mm above the rear garden level.

Yours faithfully
