Subject: Planning Reference FP/132/14/HH

Dear Janice

I saw planning at 10 Grafton Ave , reference FP/132/14/HH, I have open their planning and I am not happy as the car port is right on boundary line of my fence and adjacent to my property wall. The edge of the car port should be line with garage wall not boundary line.!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!

Also car port is longer toward from garage to adjacent of my property how can I access to my wall for future repairs which can be foul by ladder against car port.

I ask you to come to my house and I will show you and its quite serious matter.

If I am selling my property I do not want put off buyer due to car port adjacent my property!!!!!!

What about the rain water flow to avoid over my boundary line and my property???????

I am serious concerning about this situation.

I have attached my sketch what I think should be like that.
