Hi Neil,

Sorry in the delay in getting this email to you, as discussed with regards to the drainage channel at the lowest part of your driveway we would construct it as follows,

- 1) Remove a strip along the bottom of the driveway just in front of the soldier course edging.
- 2) Remove a square at one end and dig a soakaway being 1 meter sq cube.
- 3) Fill this up with broken rubble with membrane laid over the top.
- 4) Concrete in a drain aquo channel across the front.
- 5) Link channel in the drain to collect all water that runs down your driveway, ensuring none cause a hazard on the pavement.
- 6) Lay all paving back where required.

I look forward to hearing from you soon.
