[Redacted]

To Arun DC – Planning Dpt

[Redacted]

Drainage Statement (Lidsey)

13 Berewecke Road, Felpham, West Sussex. PO22 7EG

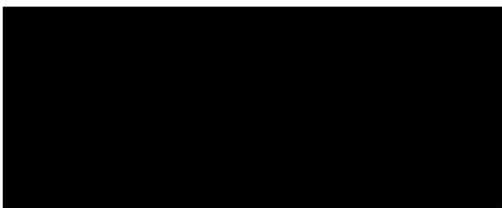

Full Planning Application

Foul Drainage –

The existing foul drainage will be unaffected by the minimal increase in appliance wastes and will continue to connect and discharge into the existing dwellings system on site and then go into the existing Southern Water Main drain within Berewecke Road.

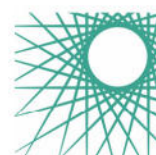

Surface Water –

There is no increase in impermeable areas and therefore the existing surface water drainage outlets will continue to be used unaltered.
